

## 門檔新技術 德國GEZE Activestop 室內門緩衝器

### 德國GEZE首次為室內門設計了一個隱形緩衝器

隱藏式的緩衝器讓您的日常生活變得更輕鬆愜意。無論是有意識的感知還是直觀式操作—他們總是給予舒適和高品質的感受。

更大的便利性與全新的感受：

全新的GEZE Activestop隱藏式緩衝器，可以將門檔緩慢地停止並安靜地關上，且能輕鬆地將門檔推開。這意味著，「砰砰」的聲響、被門夾住的手指及在牆壁或傢俱上留下傷痕的時代已經過去了！

迷你的主體，可安裝在任何標準的門框或門扇上，幾乎看不到它的存在！因此，符合最嚴苛的設計需求。

Draw-in dampers make your life easier in many areas of everyday life. Whether consciously perceived or operated intuitively – they always give the feeling of comfort and high quality.

From now on, you can enjoy this comfort when passing through your internal doors, too.

For GEZE is offering a draw-in damper for interior swing doors for the first time.

Greater access convenience – and a completely new door feeling: The new door damper GEZE ActiveStop can stop doors gently, close them silently and keep them open with ease. That means that slamming doors, trapped fingers and holes in walls or furniture are a thing of the past.

Thanks to its compact dimensions the double-sided door damper can be installed in almost any standard door leaf and is hardly visible, thus conforming to the most demanding designs.

## ➔ 產品特色：

### 和緩地停止 Gentle stopping

GEZE ActiveStop開啟時制動搖擺，並將門停在所需位置。從此擺脫門扇強力撞擊後的傢俱或牆面破損。  
Damaged walls or furniture behind doors are not only unsightly but most of all unnecessary.  
GEZE ActiveStop brakes the swing upon opening and stops the door in the desired position.

### 安靜地閉門 Silent closing

GEZE ActiveStop能使門緩慢且安靜地關閉，不僅防止門扇大聲撞擊和嚴重損壞，且能將傷害風險降至最低。  
Thanks to the active damping, the door closes slowly and silently.  
GEZE ActiveStop not only prevents loud banging and irritating door damages but also minimises the risk of injury.

### 輕鬆地開門 Keeping open with ease

GEZE ActiveStop可調節門扇開啟的停止角度，並保留在其停止的位置，從此不再需要門擋板。  
GEZE ActiveStop keeps the door open to prevent it from slamming. Separate doorstoppers are no longer needed.  
The holding position can be set individually using the adjustable opening angle.

## ➔ 產品規格：

產品特點 / Product features	規格 / Specification
門槳型式 / Door type	室內用木門、鋁門 / Wooden interior doors, Aluminum doors
門槳重量 / Leaf weight	最大至 45kg / Max. 45kg
門槳寬度 / Leaf width	最寬至 1100mm / Max. 1100mm
門槳厚度 / Leaf thickness	38mm以上 / From 38mm
開鈕型式 / Door hinge	左、右開 / for DIN left and DIN right
安裝型式 / Installation type	隱藏於門扇或門框內 / Concealed
閉門與開門扭力 / Door damping and closing	閉門扭力—大約 25° / 開門扭力—大約 60° Closing direction—starting from approx. 25° Opening direction—starting from approx. 60°
自由開門角度 / Free swing area	可自由選擇角度範圍—介於 25°至 60°之間 Freely selectable door position—between 25° and 60°
最大開啟角度 / Door opening angle	連續可調角度範圍—介於 80°至 140°之間 Continuously adjustable—between 80° and 140°
安全停門位置 / Secured final position	可保持固定在停門位置，不再需要門擋 / Safe holding of the door in the open position, no doorstop needed
阻尼強度 / Damping strength	視需求調節 / Can be set using a valve
過載保護裝置 / Protection against overload	搭配調節安全閥 / With integrated safety valve

## ➔ 全方位的諾司：

諾司亦引進德國知名品牌門槳專用的五金配件，與諾司自行研發生產的鋁製門槳做結合，運用在科技廠房內安裝，活頁與鎖鑰...等五金的維修率近乎於零；藉此，我們也將提供相同高品質五金配件給予國內門廠使用。

在跨足建築業的領域上，相信我們對品質、技術與服務的堅持，是顧客信賴諾司的基礎。
